## Census 2020: Urban and Rural Population in Iowa's Counties, 1940 - 2020

Sandra Charvat Burke

Figure 1. Percent of Persons Urban and Rural, 1850 - 2020, Iowa

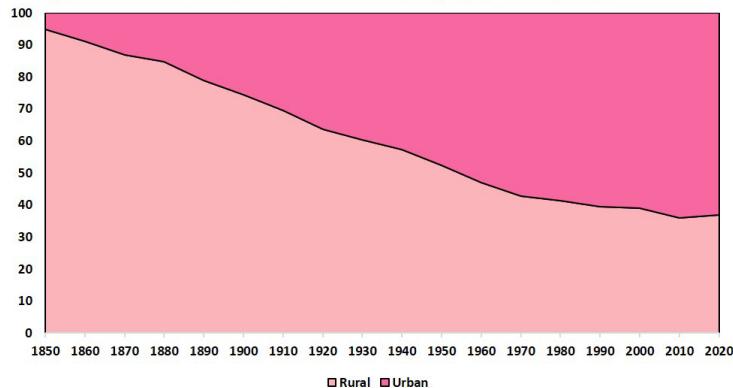

Figure 2. Percentage Urban Population, 2020, Iowa.

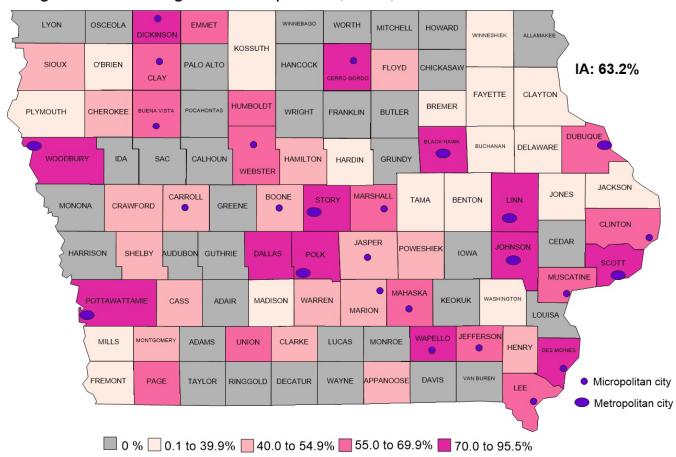

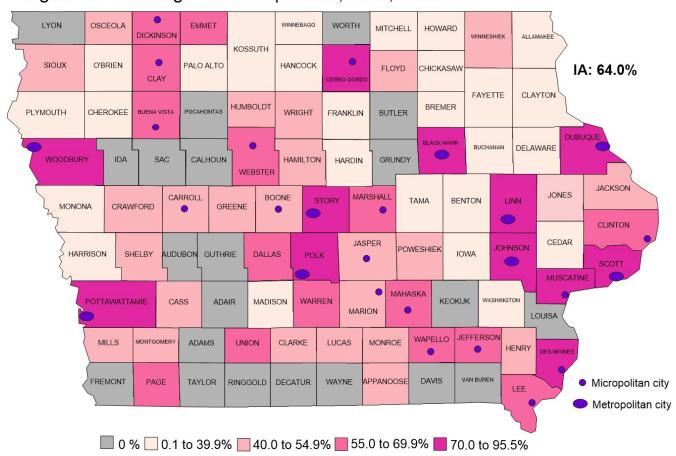

Figure 3. Percentage Urban Population, 2010, Iowa.

The Decennial Censuses<sup>1</sup> report the population that is urban or rural. In 2020, Iowa's urban population was 2,014,831 (63.2%) with the rural portion at 1,175,538 (36.8%). The U.S. as a whole was 80.0% urban and 20.0% rural.

In Iowa, the number of people in both urban and rural areas increased between 2010 and 2020 although the percent in the urban portion decreased slightly. At about the time of the 1950 and 1960 Decennial Censuses, Iowa was about half urban and half rural. Since that time Iowa has become significantly more urban (Figure 1, Table 1).

Until this last decade, Iowa's urban portion, both percentage and number, had steadily increased. The slight decrease in the percentage urban (and slight increase in the rural percentage) between 2010 and 2020 was due largely to definitional changes for designating urban communities. The Census Bureau designates a population size that an incorporated place must meet in order to be classified as urban.

Table 1. Population Urban and Rural, 1850 – 2020, Iowa<sup>1</sup>

| Year | Population | Urban     |         | Rural     |         |
|------|------------|-----------|---------|-----------|---------|
|      |            | Number    | Percent | Number    | Percent |
| 2020 | 3,190,369  | 2,014,831 | 63.2    | 1,175,538 | 36.8    |
| 2010 | 3,046,355  | 1,950,256 | 64.0    | 1,096,099 | 36.0    |
| 2000 | 2,926,382  | 1,787,432 | 61.1    | 1,138,892 | 38.9    |
| 1990 | 2,776,831  | 1,708,232 | 60.6    | 1,093,690 | 39.4    |
| 1980 | 2,913,808  | 1,683,065 | 58.6    | 1,205,576 | 41.4    |
| 1970 | 2,825,368  | 1,616,405 | 57.2    | 1,207,971 | 42.8    |
| 1960 | 2,757,537  | 1,462,512 | 53.0    | 1,295,025 | 47.0    |
| 1950 | 2,621,073  | 1,250,938 | 47.7    | 1,370,135 | 52.3    |
| 1940 | 2,538,268  | 1,084,231 | 42.7    | 1,454,037 | 57.3    |
| 1930 | 2,470,939  | 979,292   | 39.6    | 1,491,647 | 60.4    |
| 1920 | 2,404,021  | 875,495   | 36.4    | 1,528,526 | 63.6    |
| 1910 | 2,224,771  | 680,054   | 30.6    | 1,544,717 | 69.4    |
| 1900 | 2,231,853  | 572,386   | 25.6    | 1,659,467 | 74.4    |
| 1890 | 1,912,297  | 405,764   | 21.2    | 1,506,533 | 78.8    |
| 1880 | 1,624,615  | 247,427   | 15.2    | 1,377,188 | 84.8    |
| 1870 | 1,194,020  | 156,327   | 13.1    | 1,037,693 | 86.9    |
| 1860 | 674,913    | 60,028    | 8.9     | 614,885   | 91.1    |
| 1850 | 192,214    | 9,730     | 5.1     | 182,484   | 94.9    |

<sup>1</sup>U.S. Census Bureau, Decennial Censuses, 1850 - 2020

## Census 2020: Urban and Rural Population in Iowa's Counties, 1940 - 2020

Communities smaller than that designated size along with all other open or unincorporated areas are classified as rural.

For 2020, the population size for an incorporated place to be considered urban was having at least 5,000 people or 2,000 or more housing units. Although there were other detailed criteria, such as population density or separation distance, the main criterion was the base size of 5,000. Previously, a community was classified as urban if the population was 2,500 or more. Nor were housing units part of the definition. The base size of 2,500 for an urban town was a criterion that had been in place since the 1910 Census.<sup>2</sup>

As a result of this new, larger definition of urban size, twenty-eight Iowa towns lost their previous urban classification and now are considered rural. Even though half of these actually increased population during the decade, none of the gains were large enough to push the community population up to 5,000. Among the half of these twenty-eight communities that lost population during the decade, only one (Marengo) fell below the previous criterion population of 2,500. The others would have still been considered urban under the old definition. In addition to the twenty communities listed in Table 2, eight others also changed classification from urban to rural (Bellevue, Carlisle, Dyersville, Huxley, Monticello, Rock Valley, Story City, West Liberty) (Figures 2, 3; Table 2).

Another result of the definition change of urban and rural is the reclassification of the urban and rural portions of Iowa's counties. Because many of these

towns that changed from urban to rural were the only community or area in a county that was classified as urban, the new definition has also resulted in seventeen additional counties in Iowa now being classified as completely rural. In 2010, twenty-one counties were considered completely rural. For 2020 that number increased to thirty-seven which is more than one-third of the state's 99 counties. For the eight other towns noted in the previous paragraph, their change from urban to rural did not affect the overall classification of those counties as other towns in those counties continued in the urban classification (Figures 2, 3; Tables 2-4).

Across the eight decades shown in this report, Iowa's urban population increased by more than 900,000. A majority (59) of Iowa's counties have maintained some amount of urban population throughout this time as well. Another fourteen counties had some urban population for all the decades until the definition change implemented in 2020 (Figures 2, 3; Tables 1, 3 - 4)

Not surprisingly, many of the counties with the state's metropolitan cities recorded the highest percentages of urban population in 2020. Six counties (Johnson, Woodbury, Linn, Scott, Black Hawk, Polk) exceeded 80% urban. Polk was highest at 95.5%. Another seven counties (Cerro Gordo, Dallas, Dickinson, Des Moines, Pottawattamie, Story, Wapello) had at least 70% urban population (Figure 2, Table 3).

As Iowa's population grew, so did the metropolitan counties. Eleven counties more than doubled their urban

population between 1940 and 2020. Warren County's urban portion grew more than six times, Johnson's grew more than seven times, and the urban portion of Dallas County increased more than 13 times between 1940 and 2020. Johnson and Linn Counties each added more than 100,000 urban residents and Polk's urban count gained more than 300,000 (Table 4).

In contrast to these highly urbanized counties, ten counties (Adair, Adams, Butler, Guthrie, Keokuk, Louisa, Ringgold, Taylor, Van Buren, Wayne) had no urban communities, thus no urban population at all nine censuses reported here. Eight others (Calhoun, Decatur, Grundy, Fremont, Ida, Iowa, Pocahontas, Worth) had only one or two decades with an urban population count. Clearly, all of these eighteen have had a rural character throughout recent decades and all were completely rural in 2020 (Figures 2, 3; Tables 3, 4).

Between 1940 and 2020, Iowa's overall rural population declined by more than 278,000. Most counties (82) also had less rural population across that time period. Fifteen counties had less than half the rural population in 2020 than they had in 1940. Adams County had around one-third the rural count at the second time period compared to the first (Table 4). These findings should not come as a surprise in light of the population changes noted in the 2020 Decennial Census which found that sixty-nine of Iowa's ninety-nine counties recorded population declines between 2010 and 2020. The rural areas of Iowa have been hit with population losses across several decades.<sup>3</sup>
